

Accreditations

ISO 9001:2000

ISO 9001:2000 specifies requirements for a quality management system for an organization and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable regulatory requirements.

U Stamp

Pressure Vessels and Heat Exchanger Fabrication or weld modifications of unfired pressure vessels require the U" stamp Accredited by American Society of Mechanical Engineers (ASME). Any construction stamped with this symbol shall have been built strictly in accordance with the provisions of the ASME Boiler and Pressure Vessel Code.

R stamp

R stamp is a National Board Inspection Code for repairs and alterations of previously ASME coded stamped Vessels, Boilers and Piping. This provides a high degree of confidence that all processes are undertaken to the established safety standards.

CE Marking

The CE marking (also known as CE mark) is a mandatory conformity mark on many products placed on the single market in the European Economic Area (EEA). The CE marking certifies that a product has met EU consumer safety, health or environmental requirements.

NB Stamp

The NB stamp is issued by The National Board of Boiler and Pressure Vessel Inspectors to promote greater safety to life and property through uniformity in the construction, installation, repair, maintenance, and inspection of pressure equipment
