

Fin Fan Air Coolers

Manufacture

Serck design and manufacture Fin Fan Coolers with ferrous and non ferrous fin tubes as per the parameters and design codes. Serck is a certified ASME 'U' Stamp Certificate holder (ASME Section VIII Div I), CE Certified as well as being authorized to use the 'R' Symbol for the repair of air coolers in accordance with the provision of National Board. We work closely with major Inspection Agencies such as Lloyds, D.N.V., A.B.S., etc

Refurbishment

Serck undertake complete refurbishment of fin fan air coolers on site. From complete Re-tubing, partial re-tubing, coating of fins, water jetting of tubes, fitting of liners in leaking tubes, combing of fins, fixing of fin supports to pressure testing as site.

Clients

We serve our clients in Power Generation and all traditional areas of process industries such as chemical, Petrochemical plants, Oil Rigs and Refineries.
