

Marine Charge Air Coolers

Manufacture of Marine Charge Air Coolers

Serck manufacture and supply complete range of charge air coolers for all applications in Marine industry. Serck have a comprehensive data base of Main Engine Charge Air Coolers featuring all the main manufacturers including B&W, MAN etc. From this data base we are able to manufacture a complete new unit and have it shipped to wherever your vessel is usually in 5-7 days upon confirmation of drawing.

Serck manufacture marine charge air coolers with sizes varying from 3/8" 1/2", 5/8" 3/4" and 1" with Fin Per Inch from 8 – 20 depending upon the design. We can go on board to take manufacturing drawings of charge air coolers and manufacture as per sample upon taking dimensions in 6 days time.

Alternatively, a less expensive option is for us to re-block (Fin and tube element) your cooler utilizing the existing tube sheets and side frame, depending upon the suitability of tube pitch.
